

AMWC WARGAME – AFTER ACTION REVIEW

Game ended: D+0 / 0700L | Generated: 5/31/2026, 11:52:56 PM

DIRECTOR'S AAR NOTES

- Blue: How did only having one firing asset in place when you sent your scouts out affect your ability to prosecute targets?
- Blue's collections plan facilitated decision-making. Red's collections were heavy on influencing targeting.
- How would you have adjusted your collections plan had you needed to fight out two more turns?

INJECT LOG (1)

⚡ Weather / environment change – Turn 1 • D+0 / 0700L • Both teams

Storms have rolled in. Cloud ceilings are dangerously low. Air support will not be available and airborne ISR platforms will be severely degraded.

TURN 0 – D-1 / 0000L

BLUE FORCE

Collections: Scout Tm 1 / NAI 1 / 2 x 2km / PIR 1. Visually identify and report composition/direction of tracked or wheeled armored vehicles (3+) moving east. | GSP / NAI 3 / 4 x 4km / PIR 3. Report seismic and acoustic signatures indicative of heavy vehicle movement on southern unimproved roads. | MQ-9 / NAI 1 / 6 x 6km / PIR 1. Identify and track enemy main body; locate High Payoff Targets (C2, bridging equipment, air defense).

Maneuver: ME: Move to → TAA West, PL Green | SE1: Move to → TAA West, PL Green | SE2: Screen → N of 92 Northing | HQ: On order → FWD to PL Green

Fires: EFST 1 ACTIVE on ()

Cmd Note: "Scouts and LAR have moved into position to begin collecting per collections matrix. All elements moving North to PL Green. EFST 1 is active."

Adj-Collections: Scout Tm 1 reports AG composition and movement. GSP corroborates. MQ-9 locates Golden Ray with EW suite.

Adj-Maneuver: Elements reach their positions without contact.

Adj-Fires: EFST 1 triggered. M777 battery engages with Excal rounds. 1/1 Golden Ray destroyed.

Dir Note: Enemy lead element also met EFST 1 criteria, but only one firing agency available at time of firing. Next turn will take us to D-Day / 0000.

RED FORCE

Collections: Golden Ray / NAI 1, 2 / 8 x 8km / PIR 1, 3. Conduct Direction Finding (DF) on US C2 networks and RQ-21/MQ-9 datalinks to locate US Command Posts and CAS staging | CH-802 (Sortie 1 & 2) / NAI 1 / 4 x 4km / PIR 1, 2. Visually locate US engineer turn/block obstacles and hull-down ACV or ATGM positions on high-speed avenues.

Maneuver: AG: On order → Conduct route clearance on MSR Green. | FRAG: Move to → PL Black. Hold until AG reaches PL Yellow. | DAG: Hold → In TAA until FRAG passes PL Black. | TMG: Hold → In TAA until DAG passes PL Black.

Fires: EFST 1 ACTIVE on ()

Cmd Note: "Upon Golden Ray and FRAG established, AG pushes along MSR Green, clearing up to PL Black. The AG reaching PL Black is the conditions set for the rest of the elements to begin moving."

Adj-Collections: Golden Ray reported spike in VHF approximately 4k south of its position, but has not been reachable since. CH-802 has detected a turning obstacle at grid 1234 5678, forcing movement off the MSR, to the North.

Adj-Maneuver: AG is approximately 2k south of the turning obstacle. All other elements are in position, no contact.

Adj-Fires: None.

Dir Note: Next turn will take us to D-Day / 0000.

TURN 1 – D+0 / 0700L

BLUE FORCE

Collections: Scout Tm 1 / NAI 1 / 2 x 2km / PIR 1. Visually identify and report composition/direction of tracked or wheeled armored vehicles (3+) moving east. | GSP / NAI 3 / 4 x 4km / PIR 3. Report seismic and acoustic signatures indicative of heavy vehicle movement on southern unimproved roads. | MQ-9 / NAI 1 / 6 x 6km / PIR 1. Identify and track enemy main body; locate High Payoff Targets (C2, bridging equipment, air defense).

Maneuver: ME: Defend → Retain BP1 | SE1: Attack → Mech force approaching obstacle belt. | SE2: Defend → Consolidate at BP1 | Reserve: On order → BPT FPOL with SE1 and CATK south

Fires: EFST 2 ACTIVE on () | EFST 3 ACTIVE on ()

Cmd Note: "DP 1 and 2 triggered. Fires and air shifted to SE1. Fire EFST 2 ISO SE1. Fire EFST 3 if enemy Mortars ID'd. SE1 now has priority of fires. SE2 will consolidate with ME to defend BP1. Reserve, standing by to CATK or Block South."

Adj-Collections: MQ-9 follows mech company. Mech company halted 4k north of turning obstacle, grid 1234 5678. Scout Tm 1 and GSP report large mechanized convoy. At least 15 mechanized vehicles with engineer assets.

Adj-Maneuver: LAR shifts south, contact with mechanized infantry. SE1 engages lead elements. Destroys 8/12 mech vehicles due to EFST 1 firing in support.

Adj-BDA: 1 K-Kill, 1 M-Kill, 2 egressed back to link up with friendly units. Reports large, mechanized force with IDF in support. SE1 took 2 K-Kill, 3 M-Kill (ACVs) from IDF and FW support.

Adj-Fires: EFST 1 triggered. M777 battery engages with HE rounds. 8/12 vehicles destroyed (Same BDA for SE1)

Dir Note: Next turn will take us to D-Day / 0700.

RED FORCE

Collections: CH-802 (Sortie 1 & 2) / NAI 1 / 4 x 4km / PIR 1, 2. Visually locate US engineer turn/block obstacles and hull-down ACV or ATGM positions on high-speed avenues.

Maneuver: AG: Support by fire → FRAG as they engage mechanized force. | FRAG: Attack → Mech force along MSR, North of obstacle. | DAG: Attack → Conduct envelopment from South to North of Mech force. | TMG: On order → Exploit penetration of DAG to attack in enemy rear area.

Fires: EFST 2 ACTIVE on () | EFST 3 ACTIVE on ()

Cmd Note: "FRAG is ME. Fire support is DS to FRAG. Upon engagement by FRAG, DAG will execute single envelopment and enable the TMG to penetrate into the enemy's rear area."

Adj-Collections: CH-802 reports large enemy mech force engaging AG. Golden Ray's destruction confirmed.

Adj-Maneuver: AG engaged by mechanized force. FRAG is approximately 2k south, travelling north towards AG. DAG and TMG report contact with LAR.

Adj-BDA: 8/12 mechanized vehicles destroyed in AG. Remaining 4 egressed south to link up with FRAG. DAG/TMG destroy 1 LAR, 1 M-Kill.

Adj-Fires: EFST 2 triggered by US anti-armor assets spotted by 802 and the AG.

Dir Note: Next turn will take us to D-Day / 0700.
